Profumeria Maxima snc di Trombetti e Piva

Breast repulp gel 200 ml

€54.80

Specific treatment for breast and décolleté. A fresh, light gel which is immediately absorbed, without any need to "work" on this delicate area of the body. Specific ingredients of plant origin combat the negative effects left by time and fluctuating weight, providing a genuine lift effect on the bust, improving firmness, re-plumping skin structure in this area, which is more prone to loss of elasticity with ageing and natural sagging. The BIOGLEA™, the Thermal Plankton extract of Terme di Saturnia, has a long-lasting hydrating and balancing action. Applied daily after bathing or showering, BREAST REPULP GEL helps maintaining the youthful beauty of the bust and décolleté.
